

Education

NED University of Engineering and Technology

Software Engineering

October 2023 - December 2027

- Relevant Coursework: Programming Fundamentals (Python), Object Oriented Concepts & Programming (C++), Data Structure Algorithms & Applications, Software Engineering, Software Construction & Development, Database Management Systems, E-commerce, Software Design & Architecture, Design & Analysis Of Algorithms, Discrete Structures, Computer Communication and Networks, Computer Architecture and Logic Design, Engineering Economics & Management, Technology Management, Fundamentals of Information Technology.
- Honors & Awards: Recipient of the Jauhar Undergraduate Fellowship, worth 10,000 PKR in the second, third, fourth, and fifth semesters.

School & College:

The Educators School, Matriculation – 2021 (89%, Grade: A-ONE)

Government Girls Degree College – 2023 (90%, Grade: A-ONE)

Experience & Internships

Virtuosoft – IT CONSULTANCY FIRM

Software Quality Assurance Intern | Oct 2025 – Present

Performed manual testing to ensure functionality and stability

Contributed to quality assurance of Buypass.ai — a super app comprising modules like Seller, Buyer, Mashwara, and Rider Management

CODSOFT IT SERVICES AND IT CONSULTING

Python Programmer Intern | Mar 2024 – Apr 2024

Worked on Python programming projects and basic automation scripts.

Practiced writing functions, loops, conditionals, and input handling.

Affiliate Marketing Experience:

Ran campaigns independently on platforms like AliExpress, Alibaba and Amazon.

Skills

- Professional Skills: Python, C++, C#, HTML, CSS, SQL, Git, VS Code, Manual Testing, Test Case Design, SDLC & STLC concepts, Regression Testing, Black Box Testing, Unit Testing (basic), SRS, SDD, Postman API testing, MERN stack, PHP
- Soft Skills: Written and Verbal Communication, Team Collaboration, Time Management, Self-Motivation, Attention to Detail, Critical Thinking, Leadership, Resilience under Pressure.

Certifications

- Community Service at EduCast - Elder Care
- Volunteered for CodeSphere 2.0
- Participation in CodeSphere 2.0.

Projects

CraftKart -Ecommerce website (MERN Stack, Supabase, Tailwind,)

- Built a multi-vendor marketplace using the MERN stack with separate Buyer, Seller, and Admin portals.
- Integrated Supabase Storage for product image uploads and fast media handling.
- Designed a clean, responsive UI with Tailwind CSS, focusing on supporting women-based entrepreneurs

Boutique Store (Python, Tkinter, SQL)

- Developed a GUI-based boutique management system.
- Enabled users to browse inventory, add/remove items from cart, and process purchases.
- Used SQL for managing product database and order records.

Endless Runner Game (C++, Data Structures & Algorithms)

- Designed a side-scrolling game where the player jumps over obstacles and collects items.
- Implemented core game logic using 2D Array, stack, and queue .
- Tested game states including edge cases for collision and scoring.

Airline Reservation System (Frontend + Database)

- Built a booking system with options to search flights, select seats, and manage baggage.
- Included admin panel for adding flights and managing users.
- Connected frontend forms to a backend SQL database.

NFV Security Using AI (SDN + Machine Learning)

- Developed an intelligent network security system that detects and mitigates anomalies in real time. The Ai model learns normal traffic patterns, identifies anomalies, and block malicious ips.
- Developed an intelligent network security system that detects and mitigates anomalies in real time. The AI model learns normal traffic patterns, identifies anaomalies, and blocks malicious ips

Interests

Creative Writing, Community Volunteering, Exploring Startups & Entrepreneurship, Project Management, UI/UX Design front end development, Video Editing, Art.
